Suistainable leadership

Course content

This course on sustainable leadership provides an in-depth understanding of environmental, social, and governance (ESG) issues. It explores the pillars of sustainable leadership, including multi-level systems thinking, stakeholder inclusion, disruptive innovation, long-term activation, and a sustainable mindset. Participants will learn to navigate the complexities of sustainability challenges and develop skills in stakeholder engagement, strategic planning, and ethical decision-making. The course emphasizes the importance of a sustainable mindset and equips participants with the tools and knowledge to lead positive change in their organizations and communities.

Course objectives

- Gain a comprehensive understanding of environmental, social, and governance (ESG) issues and their impact on sustainable leadership.

- Develop skills in multi-level systems thinking to effectively address complex sustainability challenges.

- Learn strategies for stakeholder inclusion and engagement to drive collaborative decision-making and shared value creation.

- Explore disruptive innovation as a catalyst for sustainable change and develop the ability to identify and implement innovative solutions.

- Cultivate a long-term activation mindset, enabling the development and execution of sustainable strategies and goals.

Methodology

Neuroblitz offers science and drama-based trainings. All trainings are based on applied improvisation. Using our Cognitive Improvisation Method, we develop hands-on exercises and live simulations. Our seminars, workshops and learning journeys become well-remembered experiences through our interactive way of facilitating.

Target group

The course on sustainable leadership is suitable for professionals and leaders across various industries who are interested in driving positive change and integrating sustainability into their organizations. It is beneficial for individuals in managerial or leadership roles, including executives, department heads, team leaders, and sustainability champions. Additionally, professionals involved in corporate social responsibility, sustainability management, and environmental advocacy can also benefit from the course.

Duration

4 hrs, 8 hrs as a solo-course or part of a longer learning journey e.g. weeks or months

Format

All formats (On-site, online or hybrid)
